In this class, participants will learn traditional spoon-carving techniques using simple hand tools to transform a small block of wood into a functional and beautiful kitchen utensil. You'll be guided step-by-step through the entire process — from choosing the grain direction and sketching your design, to rough shaping, hollowing the bowl, refining the handle, and finishing the surface for food-safe use. Along the way, you'll learn safe knife and gouge handling and tips that make carving smoother and more enjoyable.

No prior carving experience is needed. This class focuses on creativity, patience, and the satisfaction of making something entirely by hand.
